Abstract:

An Abstract is a brief and condensed summary of an article's content, designed to provide the reader with an efficient and informative overview of the main points. The Abstract is often the first section of an article that readers encounter, and it is used to assess whether the article is relevant to their research interests. Typically, an Abstract will include concise statements that outline the subject, the article's objectives, the methodology utilized, the key findings, and the main conclusions. It is crucial that the Abstract is well-organized and concise, and generally falls within a range of 200-300 words in length. The Abstract plays a vital role in conveying the core message of the article, and helps readers to determine its significance and relevance to their research needs.

1 Introduction

The comprehensive abstracts can be written in **English**, and must be at least three pages long. The 2nd International Conference on The Evolution of Contemporary Mathematics and their Impact on Science and Technology (ECMI-SciTech 2023) is scheduled to occur on October 11th and 12th, 2023 at Brothers Mentouri University of Constantine, Algeria. The primary objective of the conference is to promote constructive collaboration among researchers across the globe who specialize in various fields of pure and applied mathematics, as well as in disciplines where mathematics plays a crucial role.

2 Main results

ECMI-SciTech@2023 The comprehensive abstracts must meet the following requirements:

They must be at least three pages long.

They must include the following elements:

- The title of the paper.
- The name(s) and the affiliation(s) of the author(s) (Author Name* for the corresponding author).
- References [1, 2, 3].

3 Conclusion

Please note that during registration, both a PDF and source files are required to be submitted.

For more information, please check the website of the conference at
